

INTRODUCING THE 3D EMLIFT

A ground-breaking new device . . .

Rejuvenation synergy

High Intensity Focused Electromagnetic energy stimulates the muscle tissue while Radio Frequency (RF) increases the stimulation of collagen production through dermal heating.

This revolutionary new treatment combines the proven technologies of High Intensity Focused Electromagnetic energy and Radio Frequency (RF) – with remarkable outcomes!

WHAT IS 3D EMLIFT?

3D EMLift, is an advanced device that combines cutting-edge technologies that are proven to deliver impressive facial rejuvenation and anti-ageing results. This innovative system utilises High Intensity Focused Electromagnetic energy combined with Radio Frequency (RF) to remodel and restore your client's skin.

High Intensity Focused Electromagnetic energy selectively engages the muscles, enhancing muscle density and quality, restoring and elevating the support of facial features. RF technology effectively increases the stimulation of collagen production and elastin fibres through dermal heating. This process results in smoother and more youthful-looking skin.

HOW DOES IT WORK?

Through the strategic placement of applicators on the forehead and each cheek, a transformative process is initiated by combining High Intensity Focused Electromagnetic technology with Radio Frequency to build strength and volume of the muscles and encourage the production of collagen and elastin. This results in a more defined, contoured and rejuvenated appearance.

TECHNOLOGY FOCUS

Muscle Stimulation:

High Intensity Focused Electromagnetic technology targets and revitalises facial muscles. It enhances muscle density and quality by selectively engaging these muscles, resulting in a lifted and more defined facial contour.

Enhanced skin tightening:

Advanced Radio Frequency (RF) technology is used to effectively remodel and tighten the skin. By heating the dermal layer, it promotes the production of collagen and elastin fibres, resulting in better skin elasticity and a more youthful, firmer appearance.

Reduction of fine lines and wrinkles:

The combined effects of RF technology and muscle stimulation contribute to reducing fine lines and wrinkles. Stimulating collagen and elastin production helps diminish the appearance of facial lines.

Non-invasive treatment:

This is a non-invasive alternative

to surgical procedures for facial rejuvenation. Clients can experience the benefits of skin tightening and muscle revitalisation without incisions or extensive downtime.

Natural-looking results:

The treatment is designed to deliver natural-looking results. It focuses on enhancing the skin's natural processes, promoting the production of collagen and elastin fibres and rejuvenating facial muscles, while maintaining the client's individual features.

Comfortable and convenient:

Treatments are painless and comfortable. This procedure is non-invasive, quick and can easily fit into clients' busy lifestyles.

Long-lasting results:

With proper maintenance and follow-up treatments as recommended, the results can be long-lasting. Collagen and elastin stimulation and muscle revitalisation contribute to sustained improvements in skin tightness and facial contour over time.

WHY CHOOSE 3D EMLIFT?

- ✓ Be one of the first to offer this innovative new treatment.
- ✓ Comparable specification to the current market-leading device.
- ✓ Affordable device with low consumable costs.
- ✓ Fast return on investment.
- ✓ Fast treatment times.

KEY BENEFITS

- Remarkable outcomes for facial lifting and anti-ageing.
- Convenient, hands-free procedure.
- Complete facial treatment in just 20 minutes.
- Optimum results achieved with as little as three to four sessions.
- Simultaneous targeting of both muscles and skin.
- Cost-effective treatment option.
- Affordable treatments.
- Completely non-invasive with no downtime required.

WHAT'S INCLUDED WITH THE PURCHASE OF YOUR 3D EMLIFT?

ONLINE TRAINING INCLUDED*

TECHNICAL SUPPORT

TRAINING SUPPORT

MARKETING SUPPORT

FREE MARKETING CONSULTATION

MANUFACTURER GUARANTEE

LISTING ON 3D CLINIC FINDER

DEDICATED BDM

COMPREHENSIVE STARTER PACK

* Please note: training is only included during the 1 year warranty period.

TECHNICAL SPECIFICATION

Input voltage range: 100-240V 50/60Hz
Rated power: 200VA
Operating temperature: 5-40°C
Storage temperature: -10-60°C
RF Frequency: 2MHz

EM Energy: 0-100%
RF Energy: 0-100%
RF Output Power: 100W
EMS Output Power: 50W

GENERAL

Fuse: 3 Amp
Max actual power noise: <40dB
Visualization: Graphic Display 10"
Android screen

Treatment time: Up to 20 minutes
Size of machine: (h, w, d): 115 x 52 x 43cm
Net weight: 41.5kg
Warranty: 12 months, subject to T&Cs
